

# Sound Level Survey Form I

Facility: \_\_\_\_\_

Date: \_\_\_\_\_

Instrument Used: \_\_\_\_\_

Serial Number: \_\_\_\_\_

Calibrator Used: \_\_\_\_\_

Serial Number: \_\_\_\_\_

Calibration Reading: Beginning Level \_\_\_\_\_

Ending Level: \_\_\_\_\_

Survey Conducted By:

Single Hearing Protection  $\geq 85$  dBA Double Hearing Protection

$\geq 96.5$  dBA\*

\*Double hearing protection level is calculated using a single hearing protector with a NRR rating of 30 dBA

| Person/Equipment | Sound Level (dBA) | Comments |
|------------------|-------------------|----------|
|                  |                   |          |
|                  |                   |          |
|                  |                   |          |
|                  |                   |          |
|                  |                   |          |
|                  |                   |          |
|                  |                   |          |
|                  |                   |          |
|                  |                   |          |
|                  |                   |          |
|                  |                   |          |
|                  |                   |          |
|                  |                   |          |
|                  |                   |          |
