

Vehicle Accident Reporting – Week of: 1/22/24 – 1/27/24

There are quite a few Brieser owned vehicles that are on the roads and highways each day. With that many trucks running and the company receiving more work, the likelihood of being involved in a collision raises each year.

All the vehicles need to be prepared for whatever situation may occur. Below is a list of safety items that should be in each vehicle.

Accident Reporting

There should be a packet for accident reporting in the rare instance that you are involved in a collision.

This accident packet should be kept in a place easily accessible. Preferably with your vehicle registration and insurance card. This packet has all the instructions printed on the front. *Please note your safety is our number one priority. Only complete this form if you are in a physical condition to do so.*

Inside this packet will be a pen and several small cards for you to complete while on scene. Prior to completing any paperwork make sure you make the important phone calls:

1. **911** or local emergency services.
2. Mike Adermann **815-405-3092** / Lexi Southall **815-521-0900**
3. Kevin Colwell **815-341-1728**

Further questions and instructions will be given to you to help you through this process. You will also need to take photographs of the scene, conditions, and damage. This will also be instructed to you.

If you have any questions or concerns about this procedure, please contact the safety department.
