

## HAND SAFETY - DATE 06/23/24 – 06/29/24

### Danger: LACERATIONS AND PUNCTURES

#### PREVENTION:

- Use the safest cutting tools available
- Maintain cutting tools; make sure blades are sharp
- Use appropriate PPE
- Never cut toward any part of your body or another person
- Remove all jewelry and tie back hair before using power cutting tools
- Always use protective guards on power cutting tools

### Danger: PINCHES AND CRUSHES

#### PREVENTION:

- Assess potential pinching and crushing hazards before starting work, then avoid them

### Danger: HAND SMASHES OR ABRASIONS WHEN CARRYING OBJECTS

#### PREVENTION:

- Before you move an object, clear clutter from your path
- Before you move an object, be sure your hands and cargo will fit through passageways
- Wear protective gloves
- If you won't be able to see clearly while moving, enlist the help of a spotter

### Danger: REACHING INTO MACHINERY OR OTHER HAZARDOUS AREAS

#### PREVENTION:

- Unplug and engage all lockout mechanisms on any machine or equipment before you reach into it
- Use a flashlight if you have to reach into a dark space
- Always be aware of where your hands are so all potential hazards are avoided
