

## Rebar Cap Awareness

Week of: 05/10/26 – 5/16/26

29 CFR Part 1926 Subpart Q, §1926.701(b)(1), *Reinforcing steel*, states:

“All protruding reinforcing steel, onto and into which employees could fall, shall be guarded to eliminate the hazard of impalement”.

We have a lot of different styles of rebar caps in our inventory. Not all of them are compliant with the regulations. **Effective immediately, all rebar caps that do not have: “California OSHA...” or “CAL OSHA...” stamped on them are to be removed from service. Please examine your inventory and remove all caps from site that do not have this stamping.**

The photos below highlight what the stamping looks like.
